Work from 5-6T—Facts about our bodies

Brain Facts

09-8-18

- Your brain is packed with millions nerve cells. Each cell has fibres that link it with other nerve cells all over your body. Your brain can think in more ways than the world's largest computer. Yet it is 80% water.

Today I learnt that the bone in your thigh carries and supports your whole body! I didn't know that the adult body has 206 bones and 600 muscles.

Your bones have 3 different jobs: they help you move, they protect your organs and they produce blood cells in bone marrow

Andre

What's inside your BRAIN?

There are two halves to your brain. You use the left side of your brain when you speak or solve problems in Math and you use the right side of your brain when you play music, draw a picture or invent things.
